

Our products have character.

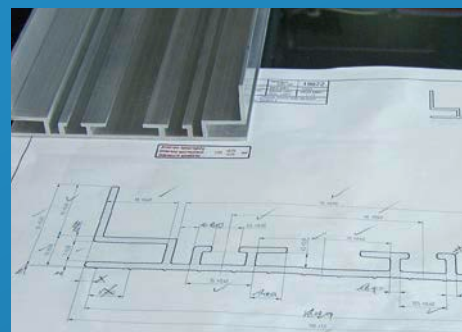

We are able to meet almost every request due to the unlimited possibilities for the shaping of aluminum drawing sections, particularly in regard to precision and decorative surfaces: anodized or powder-coated. For the implementation of your ideas, we use our national and international contacts to manufacturers.

On request, we even provide your drawing sections in an already processed state – sawn, drilled, milled ...

Please contact our staff for further information. Or use the fax sheet provided.

Just test our efficiency!
